Joshua Fajardo-Frink

Full stack Python, React, Angular Developer
Albany

Summary

With a decade of experience as a software engineer, web developer, and SEO strategist, I know what it takes to build a successful website from the ground to effectively nurture and convert your target market. I am experienced in responsive web development using Python, Django, Flask, React, Angular, Node, Next, Tailwind, Bootstrap, MongoDB, PostgreSQL, custom APIs, eCommerce, SEO, and cloud platforms.

I develop unique web apps/websites that drive considerably more sales, results, and leads to your business than the industry average. I have worked in many different industries such as professional services, retail, wine, technology, real estate, entertainment, and healthcare.

Tech Stacks:

- Python, Django, Flask
- React, Angular, Vue, Next, Node, Express, Tailwind, Material, Bootstrap, jQuery
- RESTful API, 3rd party API integration
- MongoDB, PostgreSQL, MySQL
- Azure, AWS

I meticulously manage all website projects from defining scope, market research, and concept development to your website launch and web maintenance support so you stay informed and on track every step of the way. The majority of my clients have been with me for many years because I am very passionate about web development.

My other interests include sports, music, and gaming.

Experience

PromGifts

Full-stack Web Developer

January 2018 - December 2021 (4 years)

New York, NY

- Taken part in software development life cycle (SDLC) of the tracking systems Requirements, Gathering, Analysis, Detail Design, Development, System Testing, and User Acceptance Testing and developed models in many methodologies to document existing and future processes.
